

MS Module 8: Paired data and Two Population Proportions & Variances – homework assignment

(The attached PDF file has better formatting.)

Homework assignment:

Solve end of chapter problem 51 on page 514 (1st ed) / page 526 (2nd ed), showing all work. The numerical answers are in the appendix to the textbook; for the homework assignment, show how the answer is derived. Derive a confidence interval for the difference in the population proportions, not just a point estimate.
