

Financial accounting course structure

(The attached PDF file has better formatting.)

The VEE financial accounting on-line course has 24 modules. The posts for each module show

- the textbook reading for the module + supplementary readings (if any)
- the homework assignment for the module
- practice problems to prepare for the final exam

The final exam is a 2 hour multiple choice question test. You must answer 70% of the questions correctly to pass the exam.

- You may defer taking the exam until the next semester, but you must first *inform the NEAS office* of your decision to defer.
- If you do not pass the exam, you may retake the course (at no additional charge).

You must complete at least 80% of the homework assignments to receive credit for the course.

Post questions and comments on the discussion forum modules. The NEAS instructor for the course will reply.

Passing the NEAS financial accounting course and the NEAS corporate finance course gives you credit for VEE "corporate finance and financial accounting." You may also join the NEAS financial accounting course with an approved college course in corporate finance or the NEAS corporate finance course with an approved college course in financial accounting to receive VEE credit.

VEE approval code for the NEAS financial accounting course: 9905-14516
